

Rollfix 80/100 – Mounting frames / Installation housing

NEW

Perfect optical housing borders, fully adaptable, even in suspended ceilings

NEW: modular, separate installation of screen and protective casing for efficient integration into a ceiling.

- Particularly suited for installation in to suspended ceilings
- Easy installation thanks to modular construction. The standard product comprises two modules: the ceiling installation housing and the screen with the housing cover
- No requirement for an adaptable opening as it has been integrated into housing cover
- Profile housing made of sheet steel, 1.5 mm strong (cross section 8/8 cm up to fabric width of 240 cm and 10/10 cm up to a fabric width of 300 cm)
- Soundproof thanks to a foam filling along the inside of the housing
- Supplied with a flat plug to enable the Rollfix 80/100 to be disconnected from the power supply without the need to turn off the current
- Supplied with a mounting set (100 cm long) for suspended ceilings
- An optional baffle is available for the installation housing that can later be replaced by the screen.

- **NEW:** Screen surface sits exactly in the screen casing thanks to a circular weight slot
- **NEW:** Available with a separately packed installation frame or housing (option)
- **NEW:** Perfect optical housing edges integrated in to suspended ceilings without extra adjustment flaps
