YP-100 – FEATURES

Overview | Specifications

Little helper: The Multifunctional Presentation Kit YP-100

With the practical presentation accessory YP-100 in pocket format, you can add even more mobility and flexibility to your presentations. The little expert doesn't need a laptop to make its valuable contribution - a USB to sufficient to transfer the data. Simply connect to a data projector and you're on your way

Simple connection:
The YP-100 can be connected to a large number of standard projectors via RGB cable - such as the Super Slim Projector XJ-S31 and XJ-S41.

A wide range of possibilities:
Via the USB connection of the YP-100, the following data can be transferred directly to the projector:

- Pictures in JPEG, BMP and PNG format

- MPEG4 videos with audio

- and even PowerPoint presentations (simply converted into JPEG using the accompanying software)

Additional functions:

- The Multifunctional Presentation Kit YP-100 can be used with the camera system YC-430 - without the use of a laptop

- It supports the WLAN function (two WLAN dongles are required, e.g. YW-2L from CASIO)
